SUMMARY

GTM automation and AI solutions professional with experience working directly with a startup CEO to build AI-assisted prospect qualification, outbound workflows, CRM systems, and client-facing automation projects. Comfortable translating ambiguous business priorities into repeatable workflows, technical systems, documentation, and execution plans.

WORK EXPERIENCE

JOBREADY | Remote (AI Automation Engineer / Technical Project Owner | Sep 2025 – Apr 2026)

- Worked directly with the CEO across GTM, CRM, sales, marketing, software, and client delivery, translating business priorities into workflows, outbound systems, demonstrations, documentation, and execution plans.
- Built AI-assisted prospect qualification workflows that evaluated leads across 5 criteria: ICP fit, buyer authority, geography, company relevance, and role suitability.
- Structured multi-channel outbound execution across 4 GTM platforms—LinkedIn, Instantly, Lemlist, and Expandi—and functionally coordinated 2 SDRs for about 6 weeks.
- Owned 2 client-facing automation projects from requirement gathering and workflow design through implementation, demonstrations, and stakeholder updates.

NEURION AI | Remote (Founder - AI Automation and Product Projects | Mar 2025 - Sep 2025)

- Built independent AI automation prototypes across CRM systems, dashboards, chatbots, voice agents, workflow automation, and API integrations using n8n, Make, Vapi, OpenAI APIs, Supabase, and webhooks.
- Managed product scoping, workflow design, implementation, testing, documentation, deployment, and iterative improvement for self-directed automation projects.

SELECTED PROJECTS

AI-ASSISTED GTM WORKFLOW SYSTEM (Process Design and SDR Coordination)

- Supported 1,200+ multichannel outbound touches across LinkedIn and email, contributing to 90+ replies and 12 qualified conversations while coordinating 2 SDRs over six weeks.
- Built GPT- and Claude-assisted prospect qualification workflows across 5 ICP and buyer-fit dimensions, enabling more structured targeting, prioritization, and personalized outreach.

RANGER APPARELS CRM AUTOMATION

- Converted garment-production operations into a 3-stage Bitrix24 CRM pipeline covering sample development, prototyping, and bulk-order execution.
- Added ownership visibility, delay escalation, and management follow-up workflows across the 3 production stages to strengthen operational accountability.

EDUCATION

CHANDIGARH UNIVERSITY | Punjab

Bachelor of Engineering in Computer Science Engineering, Specialization in Internet of Things
2021 - 2025 | GPA: 7.3/10

SKILLS

GTM and CRM: ICP Validation, Prospect Qualification, Outbound Messaging, Lead-List Management, LinkedIn Outreach, Instantly, Lemlist, Expandi, HubSpot, Bitrix24

Technical: Python, JavaScript, TypeScript, SQL, REST APIs, JSON, Supabase, Git, GitHub, Netlify
Automation and AI: n8n, Make, OpenAI API, Claude, Vapi, prompt engineering, webhooks, API integrations

Certifications & Training: Generative AI with Large Language Models - AWS;
Prompt Engineering-Vanderbilt University; SQL for Data Science - IBM
